Allowable Subject Matter & Examiner's Statement of Reason(s) for Allowance

5. Claims 1-71 are allowed.
6. The following is an examiner's statement of reasons for allowance:

The closest found prior art of record, specifically U.S. Patent 6,085,035 to Ungar, taken alone or in combination, fails to teach or reasonably suggest a method of detecting mutability of variables, objects, fields and classes in such a manner as recited in independent claim 1. While Ungar does discuss mutable/immutable variables and methods of defining variables as mutable/immutable, the definition of "mutability" taught by Ungar is fundamentally different from the definition recited in independent claim 1, as outlined in pages 30-31 of the applicant's remarks, filed 19 April 2004. As such, Ungar does not teach or describe a method of detecting mutability of variables, objects, fields and classes as recited in independent claim 1. Similar concepts are recited in independent claims 7, 8, 19, 26, 38, 44, 45, 53 and 60.
